

Layouts

This section makes the arrangement of your content very easy and flexible. You can enable or disable system output, define the layout of the theme's widget or module positions and select a style you created in the customizer. Additionally you have the possibility to store your modifications in a layout profile and assign it to different pages.

To configure this part go to Extensions->Template->Waxom->Options->Layouts

Click **Add** in Layouts page and enter a new name to create the layout.

“Style” option enables you to assign a style to your layout. In addition with the customizer and the layout manager this makes styling your pages very flexible.

The screenshot shows the WARP application interface. At the top is a dark blue navigation bar with links: System, Users, Menus, Content, Components, Extensions, and Help. Below this is a toolbar with four buttons: 'Save' (green), 'Save & Close' (green with a checkmark), 'Save as Copy' (blue with a document icon), and 'Close' (red with an 'X'). The main content area has three tabs: 'Details' (selected), 'Options', and 'Assignments'. On the left is a sidebar with the WARP logo and a list of settings: Settings, Layouts (selected), Modules, Menus, and Information. The 'Layouts' section is titled 'Layouts' and contains the text: 'Store your modifications in a layout profile and assign it to different pages. The *default* layout will be used on pages:'. Below this is a dropdown menu showing 'new_layout' and three buttons: 'Add', 'Rename', and 'Remove'. The 'Style' section is titled 'Style' and contains the text: 'Select which style the layout should load.'. Below this is a dropdown menu showing 'default' and a mouse cursor pointing at it. The 'Content' section is titled 'Content' and contains the text: 'Display specific content elements in the theme.'.

Content

Display specific content elements in the theme.

☐ Hide system output.

This option allows you to hide the main system output. This is useful, if you want to position only modules on certain pages, without leaving redundant space.

Menu Setting

Display specific content elements in the theme.

☒ Sticky main menu.

Allows set fixed menu when scrolling page.

Sidebars

The sidebar settings allow you to create a fully functional multi-column layout. The only requirement is to publish a widget on a sidebar position to display the selected alignment

Choose the sidebar widths and align the sidebar to the left or right.

Position	Width	Alignment
sidebar-a	25% ▼	<div>Left</div> <div>Left</div> <div>Right</div> <div>Right ▼</div>
sidebar-b	25% ▼	

Setting	Description
Width	Choose from the provided percent values to set the sidebar width.
Alignment	Define, whether the sidebar is published on the left or right side of the content

Grid

This table gives you an overview of the grid layout settings.

Choose the grid layout for each position. Further, you can enable horizontal dividers and prevent the responsive grid behavior. Note: Both options are not taken into account for the stacked layout.

Position	Layout	Responsive	Divider	Full Width	Collapse	Background	Custom Class
top-a	Parallel ▼	Stack on phones ▼	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	Yellow ▼	
top-b	Parallel ▼	Stack on phones ▼	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	Yellow ▼	
top-c	Parallel ▼	Stack on phones ▼	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	Yellow ▼	

Setting	Description
Layout	Define, whether the widgets are positioned parallel, stacked, first doubled, last doubled
Responsive	Define, on which devices the widgets take up full width and stack vertically.
Divider	Add a vertical divider between parallel or first doubled widgets/modules to separate them from each other
Fill Width	Allows to install all the elements of the position of the full width of the screen
Collapse	Define the presence of paddings between the modules. Off - modules with padding, on - modules without padding.
Background	Select one of the default background images for the positions
Custom Class	Allows to add your class to write a custom styles

Additional components

Enable / disable additional components for the selected layout

Choose which additional components need to load for this layout. A large number of active components increases the size of the site.

- ☒ Lightbox
